**ADDENDUM****Fish Action #1****January 17 through January 21, 2001****Fish Action #2****January 26 through January 31, 2001**Description of Action

The purpose of this addendum is to document the decision that the costs associated with Fish Actions #1 and #2 are covered by the CVPIA b(2) account and not by the Environmental Water Account. January exports were curtailed at the CVP facility due to the Sacramento Catch Index reaching a value of 10 or more. At that time, the 50% and 90% exceedence hydrology forecasts indicated the Shasta Index was slightly less than 3.2 million acre-feet, making available only 600,000 acre-feet of b(2) water. The January costs would have then been covered by EWA. Since the current forecasts indicate the Shasta Index is greater than 3.2 million acre-feet, 800,000 acre-feet of water is presently available for b(2).

Estimated Cost of Action

The b(2) water costs associated with the January export curtailment at the CVP facilities are estimated to be 38,746 acre-feet.

Method Of Accounting For Costs

The actual b(2) accounting will be determined from the comparison of the pre-CVPIA daily CVP operations to actual daily CVP operations, as specified in the October 5, 1999, Decision on Implementation of Section 3406(b)(2) of the Central Valley Project Improvement Act.

Carl A. Torgersen, Chief  
SWP Operations Control Office  
Division of Operations and Maintenance
